To Whom It May Concern:

In August , pursuant to our agreement with Huntflow LLC, the Bishop Fox assessment team conducted an application penetration test of the Huntflow web application and API.

The assessment objective was to identify, within the designated time and scope, any security issues in the Huntflow web application and API. The assessment team combined automated application vulnerability scanning and manual penetration testing techniques in order to rapidly locate attack vectors and simulate real-world exploitation.

Huntflow has been provided the detailed findings and recommendations resulting from the assessment in an assessment report, which includes three low-risk vulnerabilities (21 instances).

Sincerely,

Thomas Eston
VP of Consulting and Cosmos Delivery
Bishop Fox
