Huntflow LLC  
127015 Office 6  
2/2 Novodmitrovskaya Ulitsa  
Moscow 127018  
Russian Federation

To Whom It May Concern:

In February of 2022, the Bishop Fox assessment team conducted a limited penetration test of the Huntflow web and iOS applications, as well as their external infrastructure; a host-based security review of their hosting systems; and a review of the responses Huntflow LLC provided for a self-assessment questionnaire. For detailed information on the products and Google APIs in scope, please see Appendix A.

This testing was designed to support Google's platform risk management function, and as such the activities should not be considered a comprehensive assessment wholly or in part.

The engagement objective was to identify representative security issues within a time-boxed assessment. The Bishop Fox assessment team combined automated network and application scanning with limited manual penetration testing to locate weaknesses. In addition, Bishop Fox reviewed the self-assessment questionnaire completed by Huntflow. For more information on Bishop Fox's testing approach, please see Appendix B.

This letter confirms that the testing of the Huntflow applications and external infrastructure has been completed. Huntflow has been provided the detailed findings and recommendations resulting from the assessment in an assessment report. At the time of this letter, no critical- or high-risk findings were discovered.

Testing for this engagement concluded on February 28, 2022. This letter is valid until March 11, 2023.

Sincerely,

Thomas Wilhelm  
Regional Director  
Bishop Fox
