To Whom It May Concern:

In February of 2025, pursuant to our agreement with Huntflow AM Limited Liability Company, the Bishop Fox assessment team conducted a hybrid application assessment of the Huntflow application and its source code.

The assessment objective was to identify, within the designated time and scope, any security issues in the Huntflow application. The assessment team combined automated application vulnerability scanning, code review, and manual penetration testing techniques in order to rapidly locate attack vectors and simulate real-world exploitation.

Huntflow has been provided the detailed findings and recommendations resulting from the assessment in an assessment report, which includes one high-risk vulnerability (six instances), two medium-risk vulnerabilities (11 instances), and three low-risk vulnerabilities (four instances). At the time of this letter, the Bishop Fox assessment team has performed remediation testing and confirms that all identified issues have been remediated.

Sincerely,

Kelly Albrink
VP of Delivery
Bishop Fox
